## PROJECTS

### Detection Of Autism Spectrum Disorder

- Autism Spectrum Disorder (ASD) poses challenges in early identification and intervention, impacting an individual's social communication and behavior. This study investigates the application of machine learning techniques for early detection and classification of ASD based on diverse datasets encompassing behavioral patterns, genetic markers, and clinical observations.
- Tech Stack : JavaScript, HTML, CSS, Python
- Collaborative project, accomplished along with 4 team members in 10 days.
- My task was creating landing page along with functionality for service. There are 2 models to detect ASD that is model selection and prediction.

### Hospital Management system

- The main objective of the Hospital Management System is to manage the details of Hospital, Doctor, Employee, Test, Medicine. The purpose of the project is to build an application program to reduce the manual work.
- Tech Stack : Java, HTML, CSS, Javascript, Spring
- Collaborative project, accomplished along with 3 team members in 5 days.
- My task was Creating APIs to handle various functionalities like patient registration, appointment scheduling, billing, inventory management.
